Li Tie
former China international
player and midfielder for
English premier league
Everton FC

History of AirGoal

2006 **2009** **2011**

The first patented inflatable football goal in the world was designed and manufactured in AirGoal R&D department.

Be introduced to Japan and European countries, recognized by the market.

Collaborating with China FA and assist in providing equipment to National Primary Schools champions Cup.

2012 **2013** **2014**

AirGoal received compliments from AFC and had been displayed in AFC headquarter in Kuala Lumpur.

Became the designated soccer goal for Malaysia national football development program initiated by the government.

Distributed to Carrefour Europe-wide as its promotional item during FIFA 2014 World Cup.

2015 **2016** **2017**

Li Tie, former player of EPL side Everton and won the footballer of year in China, joined AirGoal as chief consultant and endorser.

More than inflatable series products. By expanding the scope of business, AirGoal offering professional full range of football training equipment and continue to provide more creative portable sports equipment.

AirGoal officially became the football equipment services supplier of China football international team and the partner to CFA Team China.

Advantages of AirGoal

Safer

Hose would curve and restore to normal straight position when it collides with players, which helps to prevent injuries.

Faster

Inflate/ deflate in seconds with the two-way air manual pump.

Stronger

Rigid enough after inflation. Sustainable for powerful shooting. The ball rebound effect similar to what the steel goal does.

Portable

Pack up your AirGoal with all accessories in the bag that fits the car trunk.

Valve

Turning the valve fully anti-clockwise for inflation. Turning the valve fully clockwise to quick release the air automatically.

Netting

Each AirGoal post has the pre-attach netting. Durable twisted PE mesh netting for professional series.

Structure

The hose is made of thermoplastic polymer and high tenacity terylene yarn in three layers structure. Engineered with PC/ABS material as the connectors.

Accessories
